

# BIOPLASTIC BAGS

Collect & compost  
with organic waste

25% plant  
starch

Combined with  
biodegradable  
co-polyester

BioPak's 100% compostable plastic bags are made using EcoPond, a starch-based bioplastic that is certified compostable to Australian standards AS4736. They can be home and commercially composted.

## What is compostable and biodegradable plastic?

Compostable plastics are capable of undergoing biological decomposition in a compost environment, the material breaks down to carbon dioxide, water, inorganic compounds and biomass, at a rate consistent with known compostable materials such as cellulose; leaving no toxic residue.
